Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (currently amended) A method for migrating a database comprising:
obtaining said database in a first database format;
representing said database in an abstract database format, including one or more views;
using said abstract format to convert said database to a second database format; and
migrating said database in said second database format, wherein said one or more views provide a common abstraction of differences between the first database format and the second database format.
2. (original) The method of claim 1 wherein said database is a production database.
3. (original) The method of claim 1 wherein said database uses a data model.
4. (canceled)
5. (original) The method of claim 1 wherein said step of using said abstract format further comprises:
writing scripts.
6. (original) The method of claim 5 wherein step of writing said scripts further comprises:
writing functions to correct data format conversion.

Serial No. 09/922,032

Reply to Office Action of January 5, 2005

7. (original) The method of claim 5 wherein step of writing said scripts further comprises:

building temporary tables to map values in the first format database to values in the second format database.

8. (original) The method of claim 5 wherein step of writing said scripts further comprises:

extracting data from database in first format into insert statements for the database in the second format.

9. (currently amended) The method of claim 8 wherein said step of extracting data from database in first format into insert statements for the database in the second format further comprises:

exporting a sample database;

importing the said sample database into a test area;

running said scripts ~~created in claim 5~~; and

comparing the data of the database in a first format with the data of the database in a second format.

10. (original) The method of claim 9 wherein step of comparing said data of the database in a first format with said data of the database in a second format further comprises:

comparing and checking the record counts;

comparing and checking the key and other value counts;

comparing and checking the graphical user interface (GUI); and

comparing and checking the logs.

11. (currently amended) A computer program product comprising:
a computer usable medium having computer readable program code embodied therein configured to migrate a database, said computer product comprising:

Serial No. 09/922,032
Reply to Office Action of January 5, 2005

computer readable code configured to cause a computer to obtain said database in a first database format;

computer readable code configured to cause a computer to represent said database in an abstract database format, including one or more views;

computer readable code configured to cause a computer to use said abstract format to convert said database to a second database format; and

computer readable code configured to cause a computer to migrate said database in said second database format, wherein said one or more views provide a common abstraction of differences between the first database format and the second database format.

12. (original) The computer program product of claim 11 wherein said database is a production database.

13. (original) The computer program product of claim 11 wherein said database uses a data model.

14. (canceled)

15. (original) The computer program product of claim 14 wherein said step to use said abstract format further comprises:
to write scripts.

16. (original) The computer program product of claim 15 wherein step to write said scripts further comprises:
to write functions to correct data format conversion.

17. (original) The computer program product of claim 15 wherein step to write said scripts further comprises:
to build temporary tables to map values in the first format database to values in the second format database.

Reply to Office Action of January 5, 2005

18. (original) The computer program product of claim 15 wherein step to write said scripts further comprises:

to extract data from database in first format into insert statements for the database in the second format.

19. (currently amended) The computer program product of claim 18 wherein step to extract data from database in first format into insert statements for the database in the second format further comprises:

to export a sample database;

to import the said sample database into a test area;

to run said scripts ~~created in claim 15~~; and

to compare the data of the database in a first format with the data of the database in a second format.

20. (original) The computer program product of claim 19 wherein step to compare said data of the database in a first format with said data of the database in a second format further comprises:

to compare and check the record counts;

to compare and check the key and other value counts;

to compare and check the GUI; and

to compare and check the logs.
